Topics in Chemistry

1. The structure of the atom
2. The periodic table
3. Intramolecular and intermolecular bonds, lattice types
4. Shapes and polarity of molecules
5. Solutions
6. Acid-base reactions
7. The hidrogen and its compounds
8. The halogens and their compounds
9. The oxigen group and the compounds
10. The nitrogen group and the compounds
11. The carbon group and the compounds
12. Metals
13. Electrochemistry
14. Saturated hydrocarbons
15. Unsaturated hydrocarbons
16. Aromatic hydrocarbons
17. Carbon compounds containing oxigen
18. Carbon compounds containing nitrogen
19. Carbohydrates
20. Aminoacids and proteins
